Designing surfaces: beautiful walls and ceilings

Each room is as unique as the people who occupy it. Building owners and occupants recognise that functional room planning in a healthy environment is as much a priority as decorative aspects. Combining these criteria as efficiently as possible requires a carefully devised overall concept.

We all want an interior design which makes us feel right at home. After all, we spend a large part of our lives inside – either where we live or where we work.

If a room's design creates a pleasant atmosphere, we will enjoy spending time in it.

Ceilings and walls are essential components of a room concept and require the right solutions for different needs.

Aspects relating to the design are just as important as eco-friendly ones, because beauty and function should go hand in hand. The StoSignature Interior Collection #01 offers a large selection of solutions.

For many years now, we here at Sto have been developing surface collections that consistently draw inspiration from the latest international trends. The result is a sophisticated range of colour and material concepts. Surfaces determine the atmosphere of a room, with aspects such as colour, texture, material, and feel all playing a significant role.

Our products are quality-checked and offer flexible combination options, which means that you can offer your customers individual solutions and unique results. From substrate preparation to the finished surface, Sto ensures systematic quality. The new StoSignature Interior Collection #01 provides all the components to create the perfect interior design in any room.

This brochure includes all kinds of ideas and options for custom surface and room designs. Take a look, be inspired, and create your own unique interiors!

The StoSignature Interior Collection #01 is a source of inspiration for architects, interior designers, tradesmen, and building owners, helping them make their own ideas a reality and make their unique mark on walls and ceilings. It represents the natural progression of earlier collections such as “Created by a master”.

Loft

Penthouse

A penthouse represents exclusive living above the city's rooftops – right in the middle of things and yet far away from the hustle and bustle of the streets. The deep red of Chimney and the unconventional surface created by Rope make this room a calm and natural scene. The muted tones provided by the America colour palette underline this impression.

Colour palette: America

Penthouse

Rope

An adapted form of the sgraffito technique gives this simple surface an attractive accent.

Nature at its most beautiful: the Penthouse concept combines tried-and-tested raw materials with impressive functional properties. The surfaces are based on lime, a natural material, and their water-vapour transmission rate allows them to help regulate an ideal ambient interior climate. Combined with specialist application techniques, the materials lend the surfaces a certain natural beauty.

Sandstone

This subtle surface combines a natural look with functional properties.

Lobby

The Caiman wall surface imitates reptile skin and will inevitably catch your eye. It harmonises perfectly with the Earth surface and the Italy colour shades. Both walls add a luxurious ambience and a touch of dolce vita to the room.

Focus on what is special: Lobby has an unconventional character that leaves a powerful impression. The Caiman surface imitates reptile skin so effectively that onlookers will immediately want to reach out and touch it. The Earth texture is reminiscent of a dried-up river bed and draws your attention to it. Denim, meanwhile, resembles jeans-like material that impressively casts the spotlight on the surfaces.

Caiman

Flashes of gold in this stamp technique create highlights in the reptile skin-like surface.

Salon

Rich colour shades and lavish furniture designs – this is where French charm meets metropolitan flair. The Ribbons wall area embodies pure elegance, while the striped look creates the impression of high ceilings. The harmonious France colour shades lend any surface that certain something.

Walls with the wow factor: if pomp and circumstance are what you are looking for, then the Salon trend concept is the perfect solution. The imposing patterns emphasise the height and width of interior walls, and add a noble touch to any room. Although very different, the Ribbons, Strings, and Flowers textures all have one thing in common: they become the highlight of the room and transform any wall into a genuine work of art.

Flowers

This surface exudes baroque extravagance.

In some cases, planners and tradesmen need a surface that can do more than just look good. The multifunctional textures in the Lounge trend concept don't just create an effective highlight on walls and ceilings. Their sound-permeable surfaces also ensure excellent acoustics and are suitable for almost any kind of room – including nurseries, music rooms, restaurants, and bars.

International trends

Natural and technical textures as well as textile surfaces and colour impressions inspired the StoDesigners in developing the StoSignature Interior Collection #01, providing a driving force for creative and fascinating interior designs.

Our international StoDesign studios regularly work in close collaboration with architects and interior designers from all over the world to find the very latest texture and colour trends that go into our collections. This newest collection contains harmonious combinations comprising remarkable surfaces and forty on-trend shades that capture the atmospheres of various regions around the globe.

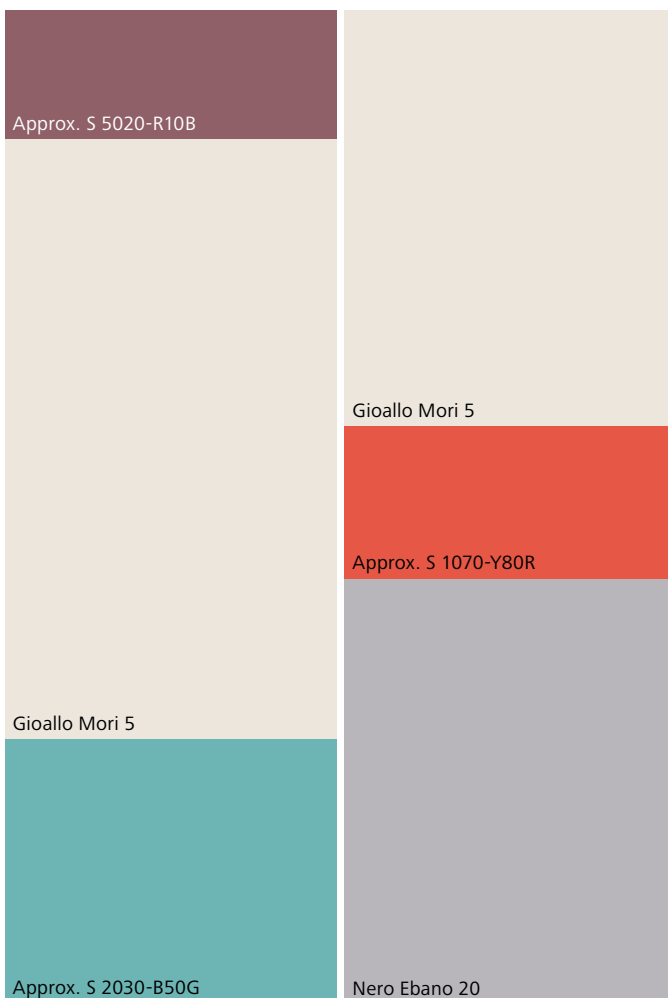

The combination of StoDesign on-trend colours result in harmonious colour palettes. Selected colour shades add a certain something and lend any room a coherent and unique atmosphere.

Sto not only offers first-class products which will help you to implement design elements for your walls and ceilings – you can also benefit from our extensive expertise and experience for all your questions. Our experts organise special training sessions and workshops which teach tradesmen, planners, or interior designers the skills to create surfaces which bear their own personal signature.

Trend colours

Germany

The Germany palette is all about crisp colours. Combine them with creamy white to switch on their full luminosity. This colour combination is complemented perfectly by a muted aubergine shade that can create earthy tones or be used as an accent to set warm highlights.

Switzerland

Exuding subtle elegance and a down-to-earth impression, the Switzerland colour palette combines earthy brown shades with a green colour accent. It is a contrast that is thoroughly modern and can create a dramatically eye-catching look, depending on how the colours are applied.

A range of on-trend colours that set the tone: harmonious colour palettes from eight countries with surges of colour from different regions provide a new source of inspiration and support when designing colours.

Austria

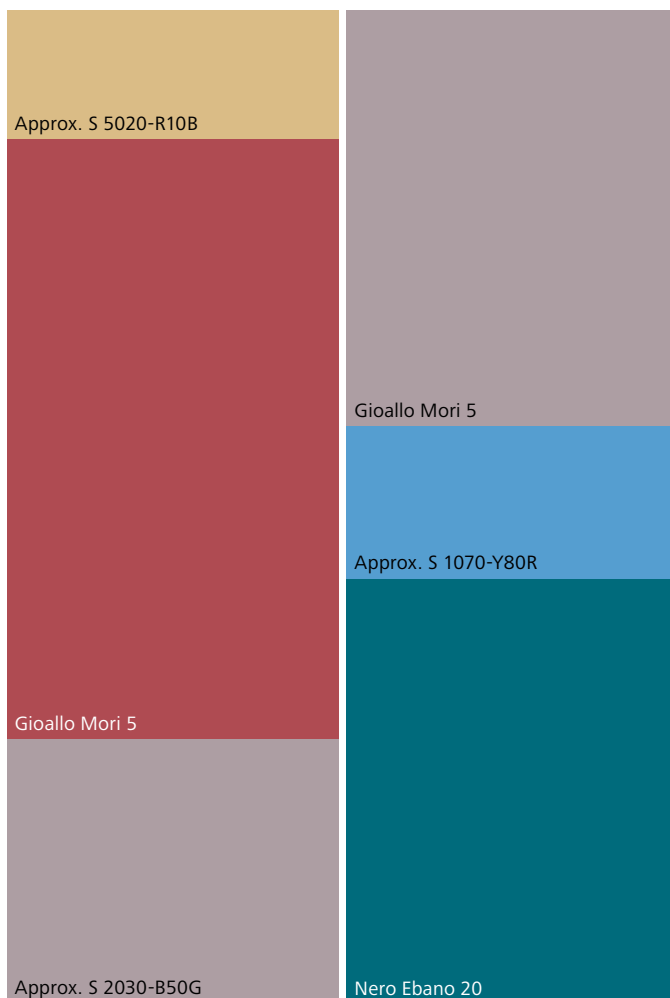

A colour inspired by Wiener Melange coffee complements shades of green pastures. A pastel pink adds a dash of colour. The Austria palette brings together tradition and sophistication, creating a stylish overall appearance in any combination.

Scandinavia

The muted colours in this palette reflect Scandinavia's close links with nature. Light shades can be combined beautifully with these subtle nuances of colour. This creates a subdued effect that is not too cold.

Trend colours

Italy

La dolce vita in colour: the bold colours of this palette are inspired by the Italian zest for life. However you apply and combine the main and accent colours, the result will remain self-assured, spontaneous, and elegant.

China

The origins of the China colour palette can be traced back to the Silk Road and the courtyards of Beijing. Sandy beige shades are combined with exquisite anthracite and a vivid pale blue.

The colour sliders show how to create completely different moods within a colour palette by shifting the focal points. Get inspired and create unique and harmonious colour combinations using our main and accent colours.

France

The France palette is a take on the Tricolore, using a deep aubergine red as well as sky blue and white. With various yellow shades complementing it, this palette creates room atmospheres that are opulent or relaxed and subtle, depending on how the colours are applied.

America

The colour trends inspired by America reflect the continent's vast landscapes: the canyons, the forests and mountains of the East Coast, and the expansive plains of the Midwest. Bright pastel colour shades provide a showcase for the deep red.
